

PolyOne OnFlex™ S EH 70A-3S7004 Thermoplastic Elastomer (TPE)

Category : Polymer , Thermoplastic , Elastomer , TPE

Material Notes:

OnFlex™-S EH thermoplastic elastomer compounds are based on hydrogenated styrenic block copolymers. This range of compounds are formulated to deliver a great cost/performance ratio in addition to typical OnFlex™-S properties such as a wide hardness range, good mechanical properties, good processability, good colourability and a wide temperature operating range. OnFlex™-S EH compounds are filled, and are therefore opaque and have a moderately high density. Properties are measured using injection molded plaques. Information provided by PolyOne
