

Pyrotek Pyroboard™ S1200 Roller

Category : Ceramic

Material Notes:

Pyroboard™ S1200 is a long wearing durable, soft covering. It must be used in high heat areas in order for it to realize its full effectiveness. The heat helps to sinter the materials so that the roll surface becomes harder as it is used. This material can be used in both preheat and annealing sections of a furnace. S1200 has shown the ability to be used in all types of furnaces that require the roll to be enclosed or in an open application. Information provided by Pyrotek.
