

Resinlab® TL5071 Anaerobic Threadlocking Compound

Category : Polymer , Adhesive

Material Notes:

The TL5000 Series anaerobic threadlocking compounds are designed for use in demanding applications to fill the spaces and surface irregularities between tightly mated cylindrical parts. They form a tough permanent bonds which greatly enhances the torque and pullout strength. These products are highly resistant to heat, corrosion, vibration, water gases, oils and many other chemicals. They are single component solvent free materials manufactured in a wide variety of viscosities to satisfy specific bonding applications. This technology increases the reliability and performance of assemblies while reducing dependence upon maintaining costly tight machining tolerances. Information Provided by Resinlab L.L.C., an Ellsworth Adhesives Company.

Physical Properties	Metric	English	Comments
Specific Gravity	1.12 g/cc	1.12 g/cc	
Viscosity	500 cP	500 cP	

Thermal Properties	Metric	English	Comments
Maximum Service Temperature, Air	350 °C	662 °F	
Minimum Service Temperature, Air	-60.0 °C	-76.0 °F	

Processing Properties	Metric	English	Comments
Cure Time	10.0 min	0.167 hour	Fixture
	480 min	8.00 hour	Full Cure

Descriptive Properties	Value	Comments
Color	Red	
Thixotropy	Medium	
Torque (ft*lbs)	250	Breakaway Torque
	350	Prevailing Torque
