

Saint-Gobain Tygon® Chemfluor® ConvoFlex®,ç Spiral Designed Tubing Aids in Self-flushing and Cleaning

Category : Polymer , Thermoplastic , Fluoropolymer

Material Notes:

Chemfluor® ConvoFlex®,ç Convoluted Flexible tubing is specifically designed to be used with the Chemfluor® line of Flare Grip® molded PFA flare fittings. ConvoFlex is easily cold flared with our FastFLARE®,ç cold forming tools -- no need for expensive straight cuffs. ConvoFlex®,ç resists chemical and elevated temperatures. It is made from FDA-approved Teflon® FEP, offers read-through transparency and features a spiral design that aids in self-flushing and cleaning. ConvoFlex tubing's outstanding flexibility, high dielectric strength and superior chemical resistance also make it an excellent choice for wire conduit. Typical Applications Aerospace Biotech Chemical processing Pharmaceutical Semiconductor Product Features Available in FEP, PFA as well as most other fluoropolymer materials Easily cold flared for use with Furon® Flare Grip® tube fittings Read through transparency Virtually unlimited length capability No need for expensive straight cuffs Continuous flow path-self flushing Pre stuffed convoFlex with a smooth bore tube inside is available in FEP, PFA, and PFA high purity Information provided by Saint Gobain Performance Products.
