

## Silberline Aquasil® "BP" 5500

Category: Other Engineering Material, Additive/Filler for Polymer

## **Material Notes:**

Silberline has specifically created Aquasil® BP grades for aqueous architectural and industrial maintenance coatings. This family offers a cost-effective alternative for achieving stability and system compatibility with a broad range of coating vehicles. This range of aluminum pigment grades offers aesthetics to meet virtually any formulating requirement. Applications: General Industrial; Waterborne

| Physical Properties | Metric      | English     | Comments      |
|---------------------|-------------|-------------|---------------|
| Specific Gravity    | 1.47 g/cc   | 1.47 g/cc   |               |
| Bulk Factor         | 0.081       | 0.081       |               |
| Volatiles           | 38 %        | 38 %        |               |
| Particle Size       | 14 Âμm      | 14 Âμm      |               |
| Particle Mesh Size  | <= 325 Mesh | <= 325 Mesh | 0.1% retained |

| Descriptive Properties | Value  | Comments |
|------------------------|--|----------|
| Aluminum Flake, wt%    | 53   |          |
| Category               | Non-leafing  |          |
| Solvents               | Mineral Spirits/High Aromatic/Nitroethane/Propylene Glycol Ether |          |
