

Silberline EX 2629 Stabilized UV

Category : Other Engineering Material , Additive/Filler for Polymer

Material Notes:

EX 2629 provides a medium-fine particle size grade of acid resistant aluminum flake pigment for use in one pack UV cured coatings. The aluminum flake is stabilized to increase the shelf life of the product in such systems. A high concentration of metal flake in a non-reactive C13-15 fatty alcohol carrier ensures both maximum formulating flexibility and good system compatibility. Applications: Printing Inks
