

## Silberline SparkleBrite<sup>®</sup>,ç 190NL-DL

Category : Other Engineering Material , Additive/Filler for Polymer

### Material Notes:

SparkleBrite<sup>®</sup>,ç "DL" pigments are non-leafing aluminum pigment pastes carried in a glycol. These grades are based on cornflake geometry and produce strong metallic effects in flexographic and gravure inks. Although SparkleBrite<sup>®</sup>,ç "DL" pigments can be used in aqueous inks and in two pack UV inks they are not treated to protect against reaction in either type of system. Special care must be taken to evaluate the stability of each grade in the final ink formulation. High or excessive shear during ink production can initiate the aluminum-water reaction. Care must be taken to avoid excessive or high shear during processing when used in ink formulations containing water. Applications:  
Printing Inks

Physical Properties	Metric	English	Comments
Specific Gravity	1.53 g/cc	1.53 g/cc	
Volatiles	38 %	38 %	
Particle Size	17 Åµm	17 Åµm	

Descriptive Properties	Value	Comments
Category	Non-leafing	
Solvents	Diol
