

Silikony Polskie Oilsil Silicone Release Agent

Category : Fluid , Lubricant , Silicone Base

Material Notes:

POLSILFORM Â® and OILSIL Â® are release silicone agents used in plastics and rubber processing. They are delivered in aerosol packagings. Both products are colourless, odorless and without solvent content. After spraying products form on the surface a thin, antiadhesion silicone fluid layer. POLSILFORM Â® and OILSIL Â® are recommended in plastics and rubber processing as agents for protection against adhesion of plastics to moulds. They are also used as agents separating from glues, putties, lute masses. They substitute talc and lengthen pot life of silicone moulds. Silicone fluid does not have any negative influence for technological processes and does not cause any defects in final products. It might be used with food production.
