

## Sinotek Materials Gasket

Category : Carbon , Graphite

### Material Notes:

These products are made from flexible graphite plates by cutting precisely. The manufacturing process is easy. Installation as well as application is convenient. Having excellent sealing property, they are suitable for the media, such as: hot water, high temperature and pressure steam, hydrogen, ammonia, solvents, hydrocarbons, super-low temperature liquids, etc. They are used as gaskets at the flange joints of different pipings, valves, pumps, heat-exchangers, condensers, pressurized vessels, towers, manholes, handholes and to make gaskets for liquid level gages and crystallizers. Information provided by Sinotek
