

SolVin 072GA Polyvinyl Chloride Latex Paste

Category : Polymer , Thermoplastic , Vinyl (PVC) , PVC, Powder

Material Notes:

Made by emulsion polymerization. APPLICATIONS Preparation of various end-products, particularly water-based inks, lacquers or adhesives. CHARACTERISTICS The water-based dispersion (latex) is basic (pH = 10). It is formed of very fine PVC particles (diameter of about 0.20 micron). This feature provides high dispersability to the resin and helps to preserve the homogeneity of the dispersion during storage. Information provided by SolVin.
