

Solvay ALKAMIDE[®] C 212 Surfactant

Category : Fluid

Material Notes:

INCI NAME: Cocamide MEACAS: 68140-00-1 Available in: Asia Pacific, Europe, Latin America and North America Applications: ALKAMIDE C-212 is a versatile and effective alkanolamide for use in soap or synthetic detergent based products to promote and stabilize lather, to increase detergency, and to impart mildness to the skin. Nearly insoluble in water, ALKAMIDE C-212 disperse readily to form an opaque, pearlescent suspension at 5% concentration. Nonionic or anionic surfactants solubilize the product readily. It is an exceptional foam builder in shampoo and bubble bath formulations in which it functions as a stabilizer and thickening agent. Information provided by Rhodia, Rhodia has been acquired by Solvay.
