

Solvay Chemicals Potassium Cryolite

Category : Ceramic

Material Notes:

Potassium cryolite (K₃AlF₆) is used for the production of welding agents, blasting and pyrotechnics, and for the production of abrasives
Tripotassium hexafluoroaluminate: CAS-No.: 13775-52-5 / EC-No.: 237-409-0 Uses: Welding and soldering agents and Fillers Information provided by Solvay

| Physical Properties | Metric | English | Comments |
|---------------------|-----------|-----------|----------|
| Molecular Weight | 258 g/mol | 258 g/mol | |

| Thermal Properties | Metric | English | Comments |
|--------------------|----------|----------|----------|
| Melting Point | 1025 Â°C | 1877 Â°F | |

| Descriptive Properties | Value | Comments |
|------------------------|--------|----------------------------------|
| Appearance | powder | |
| Color | white | |
| Composition | 70-85% | Tripotassium hexafluoroaluminate |
