

Solvay Chemicals SOLKANE® 141b

Category : Fluid

Material Notes:

Because of its low gas phase thermal conductivity SOLKANE® 141b is the best available replacement to CFC11 as a blowing agent for rigid polyurethane insulating foams. Compared to CFC11, SOLKANE® 141b is approximately ten times less harmful to stratospheric ozone and is therefore recognized as a viable solution allowing the rapid phase-out of CFCs.
