

Solvay MACKADETÂ® CA-ND Surfactant

Category : Fluid

Material Notes:

Product description: Mackadet CA-ND is a concentrated blend of mild surfactants for use as a base for high foaming surfactant systems. Mackadet CA-ND responds rapidly to viscosity building with the simple addition of sodium chloride. High foaming, high viscosity systems can be made economically and simply in plant production. Mackadet CA-ND contains a hair conditioning agent to permit easy comb-out and a lime soap dispersion aid to stabilize its foam in the presence of soap. It contains no diethanolamides. This grade is preserved with DMDM Hydantoin. Uses: High Foaming Shampoos, Shower gels, Bubble Baths, Body washes and Liquid soaps. Information provided by Rhodia, Rhodia has been acquired by Solvay.
