

## Solvay Specialty Polymers Catalyst CT/5 UV Polyolefin

Category : Other Engineering Material , Additive/Filler for Polymer

### Material Notes:

Catalyst CT/5 is a polyolefin based masterbatch to be used with cable silane crosslinkable compounds in the amount suggested for each material. Developed for Polidan® , Polidienne® and Cogegum® GFR series compounds, it is suitable for long term ageing conditions. It has the same features of CT/5 but with improved UV/VIS and aging resistance. Catalyst CT/5 can be used in a wide application range due to its catalytic activity and the anti-ageing effect given to the final product. It contains also a metal deactivator that allows its use also in direct contact with untinned copper. Features: Copper Contact Stabilized; Halogen Free. Uses: Wire & Cable Applications. Information provided by Solvay Specialty Polymers.
