

## Solvay Specialty Polymers Hyflon® PFA P7310 Perfluoroalkoxy (PFA)

Category : Polymer , Thermoplastic , Fluoropolymer , PFA

### Material Notes:

Hyflon® PFA P7310 is a clear, semi-crystalline melt processable perfluorinated resin. It is designed for electrostatic powder coatings and is particularly recommended for use as a topcoat in antistick applications. Hyflon® PFA P7310 exhibits very low surface energy, very low coefficient of friction and excellent thermal and flame resistance. Additionally Hyflon® PFA P7310 coatings show excellent smooth surface finish, outstanding antistick behavior and can maintain performance over a wide temperature range. Features: Good Surface Finish; Good Thermal Stability; Low Friction; Semi Crystalline. Uses: Coating Applications. Additional Properties: Average Particle Size - Internal Method 25 µm; Bulk Density - ASTM D1895 800 g/l. Information provided by Solvay Specialty Polymers.
