

## Solvay Specialty Polymers Polymist<sup>®</sup> F284 Polytetrafluoroethylene (PTFE)

Category : Polymer , Thermoplastic , Fluoropolymer , PTFE , PTFE Powder

### Material Notes:

Polymist<sup>®</sup> F284 is a white micronized PTFE powder composed of discrete particles. Available worldwide, Polymist<sup>®</sup> F284 is a medium molecular weight grade with excellent thermal stability, designed for use in critical high temperature engineering and high performance polymers. As with all Polymist<sup>®</sup> micronized powders, F284 offers excellent chemical and temperature residence, low surface energy, low coefficient of friction and good dispersion ability. Uses: Additive Additional Properties: Average Particle Size - Internal Method 9.0  $\mu\text{m}$ ; Bulk Density - ASTM D4895 400 g/l; Grind in Oil - NPIRI 5.00; Melt Temperature - ASTM D3418 325 to 335  $^{\circ}\text{C}$ ; Specific Surface Area - Internal Method 3.0  $\text{m}^2/\text{g}$  Information provided by Solvay Specialty Polymers.
