

## **Spartech PE4325 Reinforced High Density Polyethylene Compound**

Category: Polymer, Thermoplastic, Polyethylene (PE), HDPE

## **Material Notes:**

Spartech Polycom's filled high molecular weight, high density polyethylenes are specifically designed for blow molding and sheet extrusion /thermoforming of structural parts. These materials offer an excellent balance of stiffness, impact resistance and dimensional stability.

Typical applications for blow molding grades include automotive seat cores, heating ducts, and recreational products such as ice chests. Information provided by Spartech
