

Sterigenics Raprex[®] R-400C Thermoplastic Powder

Category : Polymer , Thermoplastic , Polyethylene (PE) , LLDPE

Material Notes:

Applications: Extrusion Coatings A thermoplastic powder based on polyethylene was developed by Sterigenics Advanced Applications for extrusion coating on metal and other surfaces. RAPREX[®],ç 400 is a modified linear low-density polyethylene powder that can be applied to metal surface employing extrusion coating techniques, giving excellent adhesion and appearance. Preliminary investigations reveal that RAPREX[®],ç 400 can also be applied to diverse substrates such as wood and other plastics. Presently there are two sub-grades of R-400 powders for different MFI ranges. Information provided by Sterigenics

Physical Properties	Metric	English	Comments
Particle Size	500 Åµm	500 Åµm	
Melt Index of Compound	28 g/10 min	28 g/10 min	
	@Load 2.16 kg, Temperature 190 Å°C	@Load 4.76 lb, Temperature 374 Å°F	

Descriptive Properties	Value	Comments
Adhesion to Copper	Good	
Adhesion to Steel	Good	
Adhesion to Wood	Good	
Color	Blue
