

## **Struktol TPW 101 Processing Additive**

Category: Other Engineering Material, Additive/Filler for Polymer, Polymer

## **Material Notes:**

Mixture of zinc stearate and waxes.STRUKTOL® TPW 101 is a general-purpose blend of lubricants designed to provide improved processing characteristics of highly filled polyolefin compounds. This product will improve filler dispersion and provide metal release for both molding and extrusion operations.

Physical Properties	Metric	English	Comments
Specific Gravity	0.955 g/cc	0.955 g/cc	
Additive Loading	2.0 - 6.0 %	2.0 - 6.0 %	Depending on filler loading and process requirements

Thermal Properties	Metric	English	Comments
Dropping Point	110 - 120 °C	230 - 248 °F	

Descriptive Properties	Value	Comments
Appearance	Off-white pastilles or beads
