TIMCAL TIMREX® 80X150 mesh FR Natural Flake Graphite

Category : Carbon , Graphite , Other Engineering Material , Additive/Filler for Polymer

Material Notes:

TIMREX Natural Flake Graphite is produced in a wide range of products distinguished by particle size distribution, chemistry and carbon content. Timcal mines the graphite from its own source in Lac-des-Îles, Quebec, Canada. Further processing can be done either in Lac-des-Îles or for high added value products (e.g. TIMREX PG25) in our new processing plant in Terrebonne, Quebec, Canada. All TIMREX"Naturals" are thoroughly controlled in our laboratories to ensure quality, consistency and total customer satisfaction.Advantages and applications: Suitable for all organic bonded friction materials, especially for linings in drum brakes as well as in brake pads for trains. Good transfer film formationGood thermal conductivityExcellent lubricating propertiesInformation provided by TIMCAL
