

TSE Industries Millathane® 76 Millable Polyester Polyurethane Rubber, 10.0 PHR Plasthall 7050 Plasticizer

Category: Polymer, Thermoset, Polyester, TS, Polyurethane, TS, Thermoset Polyurethane, Elastomer, Unreinforced, Rubber or Thermoset Elastomer (TSE)

Material Notes:

Millathane® 76 is a very suitable choice for use in products such as bushings, small copier rolls; automotive applications — bumpers, orings, hydraulic seals, belts, gaskets, solid tires — and many other high performance polyurethane applications. Millathane 76 can be vulcanized by sulfur or peroxide cured systems. Plasticizers should be used in all Millathane® 76 compounds to better incorporate fillers and improve processing. Some plasticizers are not compatible with Millathane 76, e.g. naphthenic and all paraffinic oils, however, a number of ester plasticizers perform very well. Formulation Millathane 76 100.0 Zinc Stearate 0.5 N-550 Black 40.0 MBTS 4.0 MBT 2.0 Than a cure® ZM1.0 Sulfur 1.5 Plasticizer 10.0 All information provided by TSE Industries
