

The Chemical Company ChemFlexx™ 911P Alkyl Phthalate

Category : Other Engineering Material , Additive/Filler for Polymer

Material Notes:

ChemFlexx™ is a slightly odorous linear plasticizer with outstanding performance properties. It has superior low temperature flexibility, low volatility and fogging, and excellent oven-aged retained elongation properties. ChemFlexx™ is commonly used in low fog vehicle interiors, wire and cable insulation for communication and vehicles, and low temperature films and sheeting.
