

Unipetrol C9 Fraction Redistilled

Category : Fluid , Solvent

Material Notes:

C9 fraction redistilled (RC9) is a distillation cut of pyrolysis gasoline, produced as a by-product during manufacture of ethylene. It is a transparent, colourless to yellowish liquid with prevailing content of aromatic hydrocarbons. RC9 is classified according to EC Directives as a hazardous substance. RC9 is used as a component for manufacture of engine fuels or as a raw material for chemical aftertreatment. Information provided by Unipetrol RPA
