

## Universal Wire Works ER308LSi Stainless Steel Bare Wire

Category : Metal , Ferrous Metal , Stainless Steel

### Material Notes:

This alloy is the same as ER308L, except for the higher silicon content. This improves the usability of this filler metal in the MIG welding process. The higher silicon improves the washing and wetting behavior of the weld metal, and this can reduce finishing costs particularly on thin metal applications. Information provided by Universal Wire Works for their line of welding wire and filler metal.
