

Universal Wire Works ER330 Stainless Steel Bare Wire

Category : Metal , Ferrous Metal , Stainless Steel

Material Notes:

Alloy 330 is used where heat and scale resisting properties above 1800 degrees F are required. However, high sulfur environments can adversely affect elevated temperature performance. Repairs of defects in alloy castings and wrought alloys of similar composition used in heat treating and furnace industries are common applications. Information provided by Universal Wire Works for their line of welding wire and filler metal.
