

Westlake Epolene® N-34P Nonemulsifiable - Low Molecular Weight Polyethylene Polymer

Category : Polymer , Thermoplastic , Polyethylene (PE)

Material Notes:

Description: Epolene N-34P is a polyethylene (PE) homopolymer powder that can easily be melt blended with natural or synthetic waxes to increase the tensile strength of wax blends, improve the gloss of paper coatings, aid in pigment dispersion and mold release, and improve scuff and rub off resistance in printing inks. For these applications, four Epolene N-type powders, differing mainly in viscosity, are available to choose from (Epolene N-10P, N-11P, N-14P, and N-34P). Key Attributes: Aids in pigment dispersion Easy to melt blend with natural or synthetic waxes Improves physical properties of paper coatings Increases scuff and rub off resistance in inks Low density polyethylene (PE)

Application/Uses: Building and Construction Hot Melt Adhesives Packaging Solvent borne Adhesives Wax Modification Automotive
